

PROTECTS SURGICAL INSTRUMENTS FROM AIRBORNE CONTAMINATION
REDUCES BIOBURDEN TO HELP IN THE FIGHT AGAINST SSI
RELEASES THE POTENTIAL OF YOUR STERILE PACK STORE AND IMPROVES EFFICIENCIES

- Creates a sterile field for surgical instrument and prosthetic equipment preparation
- Reduces bioburden, helps in the fight against SSI and improves patient outcomes
- Reduces burden on medical and financial resources, both during surgery and for post-operative hospital care
- Provides improved illumination for surgical instrument preparation
- Helps increase patient throughput by eliminating time lost laying-up in theatre
- Releases the potential of your sterile pack store and improves efficiencies
- Easy to install and use with low running costs
- Requires minimal building infrastructure and installation work, so no theatre downtime
- Finance options available
- Provides approximately 1,000 air changes/hr
- HEPA filtered air
- 1000mm safe working zone
- Fully self-contained
- Requires only 13 amp power supply (fused spur)
- Energy-efficient with low running costs
- Available in three sizes
- Takes up as little as 1.4m of wall space (depending on unit chosen)
- Touchscreen control panel
- Adjustable fan speed and integral LED lighting
- High quality powder-coated finish
- Quick and easy to install and use
- Relocatable
- Service options available
